## BIKE RACK 166

555.00 €

Bicycle stand made of high-performance concrete and natural aggregate. The concrete is reinforced and fiber strengthened. The aggregate structure contains natural marble or granite stones. They can be combined in different colors and are of a specific size. Metal components are electrogalvanized and powder coated. All other connecting elements are made out of stainless steel. The concrete surface is embossed and further treated with a protective coating. This makes the product even more resistant to aggressive weather conditions. It provides parking for seven bikes and the mounted rings allow locking to the stand. Through its design, the bike rack 166 makes the most of space and follows eco trends for an environmentally friendly lifestyle. Elegant furnishings for office buildings, business centers, schools, universities, metro stations and other public areas.

**Diameter:** 106.0 cm
