BIKE RACK 167

388.00 €

Bike rack made out in combination of high-performance concrete and metal. Two materials that combine strength and stability. The concrete is reinforced and fiber strengthened. The aggregate structure contains natural marble or granite stones. They can be combined in different colors and are of a specific size. The concrete surface is embossed and further treated with a protective coating. This makes the product even more resistant to aggressive weather conditions and reduces deposition of dirt. The metal structure is electrogalvanized and powder coated. These technological treatments protect the metal from corrosion and extend its performance. Elegant furnishings for office buildings, business centers, schools, universities, metro stations and other public areas. Ensure your peace of mind and the safety of your bike with Encho Enchev - ETE wheel stand 167.

Diameter: 176.0 cm

Length: 43.0 cm
