CONCRETE BENCH 246 PS polished aggregate

2,494.00 €

Bench with backrest made out of high-performance concrete and exotic, hardwood - bamboo. The concrete is with homogenic aggregate structure, reinforced and fiber strengthened. The aggregate structure is made out of natural marble or granite stones. They are of a specific size and can be combined in different colors. The aggregate surface is finely polished and creates the feeling of a velvety touch. The additional treatment of the surfaces with a protective coating makes the product even more resistant to aggressive weather conditions and reduces the deposition of contaminants. The metal components making up the seat and back of the bench are made of stainless steel. The seating area and backrest are designed at a specially calculated angle to achieve ergonomics and maximum comfort. Stylish design solution that relies on the proportion and balance between two different materials. The bench is a modern decoration to the urban exterior, and the carefully selected, certified wood brings us closer to the nature.
