## CONCRETE BENCH 268-I ES exposed aggregate

1,082.00 €

Bench model **268-I** is made of high-strength fiber concrete with a homogenous structure of natural marble or granite stones. The structural aggregates are precisely defined in size and are combined in various color combinations, which determine the primary textures: white, scatter, grey, or brown. The combination of a polished and textured surface with a seat made from certified wood allows the product to be organically integrated into various landscape solutions. The wooden elements for the seat are available in two options: pine or **eco-friendly Resysta® wood**. Developed in Germany, this innovative material is 100% recyclable and eco-friendly, with a **15-year warranty** against cracking and delamination (provided by the manufacturer). The surfaces are treated with protective coatings, safeguarding the concrete and wood from aggressive atmospheric effects and reducing the accumulation of contaminants. Concrete bench model **268-I** can be used either on its own or in combination with the other modules of the model, offering various solutions for creating beautiful and functional park spaces.

**Diameter:** 200.0 cm

**Length:** 50.0 cm

**Height:** 45.0 cm
