CONCRETE LITTER BIN 36 E35 exposed aggregate 35L

Litter bin made of high-performance concrete with natural aggregate. The concrete is reinforced and fiber strengthened. The aggregate structure is composed of natural marble or granite stones of precisely defined dimensions. The surface is embossed and treated with a special protective coating. It reduces the deposition of dirt and further increases the product's resistance to aggressive weather conditions. Metal components are electrogalvanized and powder coated. These technological methods protect the metal from corrosion and increase its performance. The possib ...
