METAL BENCH 124 MR

450.00 €

Bench combining the comfort of a certified wood and the strength of the metal. The metal structure is electro-galvanized and is powder coated. These technological methods protect the metal from corrosion and increase its performance. The planks are treated with a special coating, which protects them from aggressive weather conditions and prolongs their life. The elements connecting the individual structures are from stainless steel. Metal and wooden components have different color combinations. Together with its classic composition, the comfort in the seating area is achieved through its specially intended ergonomic design. The bench has an option for anchoring to the flooring. The fine lines combined with the classic style make it suitable for both outdoor and indoor spaces such as malls, airports, train stations. Great decoration for parks, alleys, schools, playgrounds and other public areas.
