METAL BENCH 133 MS

328.00 €

Elegant metal bench from the urban range of products by Encho Enchev - ETE. A combination of certified wood and high-quality metal. The convenience of having access on both sides makes it suitable for busy urban areas. Electrogalvanized and powder coating protects the metal from corrosion and increases its performance. A special coating is applied to the planks, which protects them from aggressive weather conditions and prolongs their life. The elements connecting the individual structures are from stainless steel. Metal and wooden components have different color combinations. The bench has an option for anchoring to the floor. The fine lines combined with the classic style make it suitable for both outdoor and indoor spaces such as malls, airports, train stations. Great decoration for parks, alleys, schools, playgrounds and other public areas.

Diameter: 190.0 cm

Length: 35.0 cm
