CONCRETE BENCH 268 C ES exposed aggregate

1,272.00 €

Concrete bench with backrest model **268-C** combines the delicate relief texture of the embossed surface with the natural warmth of wood. The concrete is high-strength and fiber-reinforced with a homogeneous structure of marble or granite particles of defined size. The model features a luxurious wooden seat, and the integration of the backrest halfway down the bench breaks up the design and adds additional comfort. The metal components making up the seat and back of the bench are made of stainless steel, as well as all fasteners. The elegant wooden elements come in a choice between two types of wood: traditional spruce or the innovative material - **eco-wood Resysta®**. Developed in Germany, this wood is 100% recyclable and eco-friendly, offering a **15-year warranty** against cracking and delamination (provided by the manufacturer). The treatment of the wooden elements and the concrete surface with protective coatings allows for added durability. The combination of concrete bench model **268-C** with the other elements of the modular bench model 268 allows landscape architects to create unique and cozy relaxation and entertainment spaces, ensuring comfort and functionality adapted to every individual taste.
