CONCRETE BENCH 268 D seat polished, sides exposed aggregate

866.00 €

Elegantly curved concrete bench that harmoniously combines form, color, and texture, providing exceptional functionality and style in the urban environment. The bench is made of high-strength concrete with a homogeneous exposed aggregate structure of natural marble or granite stones. The exposed aggregate finish is available in a variety of color variations of its constituent particles. Modern methods of processing the exposed aggregate surface allow for a combination of a polished surface in the seating area, combined with a fine relief on the sides. A special protective coating has been applied to the surfaces, which gives the product even greater resistance to adverse atmospheric conditions and reduces the accumulation of dirt. The concrete is reinforced and fiber-reinforced.

The concrete bench can be combined to create various shape variations, and its combination with the other elements of the Modular Bench Model 268 allows landscape architects to create even more attractive and cozy spaces for relaxation and entertainment.
