CONCRETE BENCH 268 M exposed aggregate

598.00 €

Elegant, rectangular, concrete planter in which shape, color and texture are harmoniously combined. The flower pot is made out of high-performance concrete and an aggregate of natural marble or granite stones. The aggregate is available in different color variations of its constituent particles. Using the modern methods of processing the aggregate structure, a characteristic relief is created. A special protective coating is applied on the embossed surface. This creates even greater resistance of the product to adverse weather conditions and reduces the deposition of dirt. The concrete is reinforced and fiber strengthened. The concrete planter can be combined with the elements of the **Modular Bench Model 268**. The flower planter is a great choice for decorating different urban spaces as well as hotels, private properties and gardens. The concrete planters of the company Encho Enchev - ETE create an atmosphere for relaxation, and provide an opportunity for everyone to touch the beauty of nature.
