SQUARE CONCRETE PLANTER 224 exposed aggregate

748.00 €

Model from the series of square flower pots and planters by Encho Enchev - ETE made out of high-performance concrete and natural aggregate. The concrete is reinforced and fiber strengthened. The aggregate is made of natural marble or granite stones with specific sizes and the possibility of different color combinations. The surfaces are embossed and treated with a special protective coating. With its size and shape, the concrete planter offers the opportunity to decorate various urban spaces as well as private properties and gardens. The natural colors of the aggregate are perfectly combined with various plant compositions and turn your city or home into an even more beautiful and cozy place. The product has horizontal decorative channels that break the classic design and create elegance and style. An original solution for arranging public places for meetings and recreation in the busy city.
