CONCRETE BENCH 211 P polished completely

790.00 €

Concrete bench made of high-performance fiber reinforced concrete and natural aggregate. The structure of the aggregate is a combination of natural marble or granite stones of a certain size in different color combinations. All surfaces are polished and further treated with a protective coating, which makes the product even more resistant to aggressive weather influences. Openings are designed along the entire seating area. They do not allow water to retain on the surface. This bench model is a smaller version of Model 83, making it an appropriate addition to smaller park spaces.

Diameter: 150.0 cm

Length: 45.0 cm

Height: 45.0 cm
