## CONCRETE BENCH 268 J ER Resysta exposed aggregate

1,345.00 €

This stylish and modern bench is the ideal choice for urban environments, elegantly blending a curved design with a sophisticated relief texture. It is crafted from high-strength concrete with a homogeneous aggregate structure of natural marble or granite particles of a defined size. The model is equipped with a luxurious wooden seat and offers a choice between traditional spruce and our innovative material - **eco-friendly wood Resysta®**. This revolutionary product, made in Germany, is 100% recyclable and environmentally friendly, offering a **15-year warranty** against cracking and delamination (provided by the manufacturer). Incorporating such a material not only enhances the bench's value but also introduces a well-deserved "green" dimension to your urban spaces. The wood elements and concrete surface are treated with protective coatings, ensuring additional resilience against atmospheric influences. Thanks to the bench's curved design, a circle with an external diameter of 4 meters can be described when combining 6 modules of the same type or with the other curved modules from the 268 series. Combining the concrete bench model **268-J** with the other elements of the modular bench model 268 allows landscape architects to design unique and cozy relaxation and entertainment spaces, ensuring comfort and functionality tailored to individual tastes.

**Diameter:** 200.0 cm

**Length:** 69.0 cm
