METAL BENCH 50 MR

371.00 €

Classic metal bench without backrest – version of model 52. Made out of certified wood and metal. Electro-galvanizing and powder coating protects the metal from corrosion and increases its performance. A special coating is applied to the planks, which protects them from aggressive weather conditions and prolongs their life. The elements connecting the individual structures are from stainless steel. Metal and wooden components have different color combinations. Due to its ability to be accessed from both sides, it is extremely suitable for the very lively places with constant movement of people. The bench equally complements the spaces in front of modern buildings, work premises, public stations, ports, airports and has an option for anchoring to the floor.
