

# Creating Brands of the Future

## METAL BENCH 48 MR

511.00 €

A lightweight model from Encho Enchev - ETE urban range of products, which incorporates classic and modern styling into one. The bench is an elegant combination between the comfort and warmth of the wood and the strength and durability of the metal. The wood is certified and the boards are special coated. This treatment protects them from rotting and prolongs their life. The metal components involved in the construction are electro-galvanized and are powder coated. These technological methods protect the metal from aggressive atmospheric conditions and increase its performance. The fasteners are from stainless steel. The bench has an option for anchoring to the flooring (on request). The metal and wooden elements come in a wide range of colors. With its classic look, the bench is suitable for parks, alleys, schools, playgrounds and other public spaces.
